

CPAT TEST

SCORE

TIME

POST NAME

Scenario: The four-person team in full PPE and an SCBA harness (no mask) will safely and effectively complete a combat challenge relay. This event will be timed with potential deductions made for unsafe or inappropriate actions. Once all times are calculated, the first-place time will receive 30 points, second-place 29 points, third-place 28 points, and following the same pattern for all teams in the competition.

Rules:

- Four Explorers from each post will participate with full turnout gear and SCBA (without mask). **Running is not allowed.**
- Team will be given a baton that must be passed from 1 team member to the other between each evolution. It can be carried or secured within PPE.
- Teams can determine where each member will be placed in the relay

Equipment: Stop Watch, axe, Handline hose (1½" or 1¾") with a nozzle, cones, utility rope, 20' x 20' tarp, infant mannequin, 2.5" short section, gated wye appliance, fireline tape.

EVALUATE EACH TEAM ON:		
1	Team member 1 adequately secures an axe to a free rope for lifting (bowline, clove hitch, half hitches)	:
2	Team member 2 adequately hoists the tool by pulling on utility rope to a height of 30 feet. NOTE: there will be a safety line/guide rope attached to the tool as well.	:
3	Team member 2 safely lowers the tool by using a hand-over-hand method for a distance of 30 feet	:
4	Team member 1 performs a straight roll on a 50' section of attack hose. Rolls hose out to best of ability	:
5	Team member 3 performs a mannequin drag for a distance of 50' (125# mannequin on grass)	:
6	Team member 3 carries an electric PPV box fan for a distance of 50'	:
7	Team member 4 crawls on a 20'x20' tarp carrying an infant mannequin. Touching all four corners of the tarp without compromising the infant and remaining on at least one knee at all times.	:
8	Team member 4 carries a 100' bundled hose section over shoulder for a distance of 100'	:
9	All/any member(s) connect a short section of 2.5" hose to hydrant (using threaded connection)	:
10	All/any member(s) connect a wye adapter to the opposite end of 2.5" hose short section	:
11	1 member connects a 50' section of attack hose to the gated wye	:
12	1 member connects a nozzle to the end of the attack hose. Time stops when the nozzle is opened.	:
CRITICAL CRITERIA – time deductions		
1	Tool was hoisted without proper knots	+:10
2	Tool was hoisted or lowered using unsafe mechanics	+:10
3	Tool was dropped from a height of more than 1 foot.	+:10
4	Hose was not properly rolled or dressed (stamped out) when complete	+:10
5	Mannequin or fan was dropped or set down during evolution	+:10
6	Unsafe lifting mechanics used during the mannequin drag or box fan carry	+:10
7	Team member 4 stood up on tarp at anytime	+:10
8	Team member 4 did not touch 1 of the 4 corners	+:10
9	Team member 4 compromised the infant during the tarp crawl evolution	+:10
10	Team member 4 drops the 100' hose deployment before complete distance	+:10
11	Members connect hoses or appliance before checking for gasket	+:10
12	The baton is dropped or placed on the ground (Add time for each occurrence)	+:10
13	A piece of PPE is removed or falls off during the relay (Add time for each occurrence)	+:10
	INITIAL TIME	:
	PENALTIES	:
	TOTAL TIME	:
